

ADVANTAGE Case Study

Client Profile

ADVANTAGE Health Solutions, Inc. is an Indiana HMO who was recently selected by CMS to pilot a program for the Indiana Medicare population. The program, which is a fee-for-service PPO, is the only one available in the State of Indiana.

Business Challenge

ADVANTAGE and Cyrca went through a rigorous approval process to meet the necessary program certifications. Cyrca's role in the program for ADVANTAGE is to provide transplant network access and patient management.

Cyrca Solution

The program was launched in 2003 and looks to be a viable fit for the more rurally located Medicare membership. Cyrca is perfectly suited to provide the coverage due to its expansive network and its proven ability to effectively manage transplant episodes when the patients are in a more rural setting away from the large transplant facilities.
